Professor Bob Carter was Head of School of Earth Sciences at the James Cook University from 1981 to 1999. He is presently an Adjunct Research Fellow studying marine geology, the Great Barrier Reef, paleoecology and climate change. Bob Carter is a widely published and well recognized commentator on Climate Change, and prefers to call himself a "Climate Rationalist."

Dr Alan Moran is a Director of the Institute of Public Affairs (IPA). He is a well known Australian economist, having worked extensively in the areas of regulation and regulation review. Until 1990 he was the senior official in the Productivity Commission and Director of the Commonwealth's Office of Regulation Review. He has also played a leading role in formulating an energy policy for the Victorian government. Alan Moran is an expert on the economics of carbon regulation.
